			1. Preliminary investigation of the two Chinook sorties that the Helicopters declared too heavy to haul indicate the net load was less than 6000 pounds each.		
			2. Presently 6 pieces of PSP and 200 engineers stakes are located at LZ Bobbie at an estimated weight not greater than 3000 pounds. The two loads hauled late this afternoon weighed about 4000 pounds each.		
			3. I think the problem with hook that would not carry the loads was either a weak ship with a full load of fuel, combined with a high density attitude and a dirty PZ or pilot attitude.		
			4. An itemized account of each of the two original loads and their weights will be sent to you tomorrow morning.
