TYPED NAME AND GRADE OF OFFICER: BEN S. CROSBY, MAJ, INF

DA FORM 1 NOV 62 1594

PREVIOUS EDITION OF THIS FORM OBSOLETE.

TPC, Japan

Incl to Journal 23 Jun 67

At 1815H I called in and requested an airlift of Co A 2/35 Inf to be conducted at 1930H on the organic company push. At 1848H, I changed this request to reflect two different lifts, specifying which was a final extraction and which was a secured lift. At 1900H, CO Co A informed me that his 2d platoon was ready for extraction. I informed Brigade of this and requested an ETA on the lift. They could not give me one but said they would call when they knew. At 1930H CO Co A informed me that he had slicks and a hook flying over his area but was unable to make contact with them. He also reported that his 2d plat called and could not make contact. When Dolphin birds were directly overhead CO Co A made radio contact with the dolphins. He told them to pick up 2d plat and, since A Co 2d plat couldn't make ground to air contact, told 2d platoon A Co to "Pop Smoke" 2d plat Co A did, and the hook went in and made a final extraction. He received, evidently, ground to air fire and he fired his organic MGs, almost hitting A & C Co. I was finally able to reach him when he landed at LZ LIZ. Informed him of the problem and told him to go to the 2/35 Company A frequency. He rogered. After picking up the 3d plat, Co A, and landing at Liz, the hook returned toward company A to pick up the rest of the company. As he passed over the area of the road, he again fired his MGs. The gunships escorting the lift immediately went into the same area and opened up with rockets and guns. When this was reported to me by CO Co A, I immediately called Brigade and requested them to cut the fire as I had no commo. We sent an element from 3/C/3/4 Cav to check the area for casualties. Initial reports indicated 5 WIA but this proved erroneous. Later an RTO monitored a report that 5 were injured, 3 PFs and 2 WIA's. At no time was permission given, or was it requested, to fire the guns in our AO. This is the facts as we know them. There may be problems we weren't cognizant of, however, we wanted you to know the facts as we have them.

Transmitted to GPT Morris, Bde Duty Officer, at 232240 June 67 by 1LT Richard J. White, Jr., Asst S3.

72	1710		A/1/14 Tunnel began at bottom of a 15ft deep Entrance was well concealed under brush, entrance went in about 10ft & tunnel then branched off in a T shape left tunnel off main tunnel was about 5ft wide and 5ft high, left tunnel made a right turn and then a half left turn, left tunnel went about 70 meters with no off shoots from it. The ends of left tunnel were either closed by cave-ins or where they had stopped digging. Tunnel on right side of T off main tunnel was about 6 1/2 ft tall and 6ft wide it ranged to 4ft tall and 3ft wide. The right tunnel ran for about 300 meters to an opening the same as the first only better concealed. The tunnel was twisting and turning for the whole 300 meters. Off this right tunnel ran a myriad of tunnels which cannot be described by words. In right tunnel had many numerous small rooms made in T shape off the tunnel; both ends of these Ts had a 15ft sq room on each end about 5ft high. Also off right tunnel was one air vent that led up to surface and well concealed airhole was circular and 3ft in diameter. There was also one other airhole off right tunnel, which went about 20ft under ground, airhole was a shaft about 6ft wide This airhole was also well concealed on sur- face.
